## PROFESSIONAL SUMMARY

Software Quality Engineer with 5+ years of experience across quality assurance, UAT, and product-focused roles, supported by 13+ years of overall professional experience. Experienced in functional, regression, smoke, and user acceptance testing, test case design, defect management, and Agile delivery using Jira and Xray. Combines hands-on QA experience with strong understanding of business requirements, user workflows, and stakeholder needs gained through Product Management and UAT experience. Experienced in developing and maintaining Playwright-based automation with AI assistance to expand test coverage and improve QA efficiency.

## TECHNICAL SKILLS

**QA & Testing:** Functional Testing · Regression Testing · Smoke Testing · User Acceptance Testing (UAT) · Test Case Design · Test Scenario Creation · Test Execution · Defect Tracking & Reporting · Root Cause Analysis · Test Documentation

**Automation & AI:** Playwright · AI-Assisted QA · AI-Assisted Test Design · AI-Assisted Automation

**Tools & Platforms:** Jira · Xray Test Management · GitHub · Visual Studio Code · Agile / Scrum

**Database & Validation:** MySQL · MongoDB · Database Validation · Backend Data Validation

**Requirements & Collaboration:** Requirements Analysis · Business Process Analysis · Acceptance Criteria Validation · Stakeholder Communication · Cross-functional Collaboration · Technical Documentation · Process Improvement

## PROFESSIONAL EXPERIENCE

**Software Quality Engineer | Concentrix | WFM and Scheduling Platform** *October 2025–October 2026*

- Perform functional, regression, smoke, and database validation testing to verify application functionality, data integrity, and release readiness.
- Design, execute, and maintain test cases and test scenarios in Jira using Xray, ensuring coverage of business requirements and acceptance criteria.
- Built Playwright-based UI/E2E automation, increasing coverage from 0% to 100% of identified critical UI/E2E flows, with 278 automated tests developed and maintained.
- Use MySQL and MongoDB for database validation, verifying application data and backend results against expected behavior.
- Identify, reproduce, document, and track software defects in Jira, collaborating with developers and Product stakeholders to investigate issues, validate fixes, and confirm resolution.
- Review user stories, requirements, and acceptance criteria to identify gaps, clarify expected behavior, and improve testability before and during sprint execution.
- Apply AI-assisted techniques for test-case design, edge-case analysis, QA documentation, automation development, and QA workflow improvement.
- Prepare release-quality reports and perform production smoke testing to communicate test results, risks, and QA recommendations and support release decisions.

**Product Manager | Concentrix | Training Management System** *October 2023–October 2025*

- Translated business needs into functional requirements, user stories, and clear acceptance criteria to support development and QA activities.

- Worked closely with business stakeholders, developers, and QA to clarify requirements, resolve ambiguity, and ensure features aligned with intended business workflows.
- Managed product priorities, backlog activities, delivery timelines, and release coordination across development initiatives, tracking deliverables and risks affecting product readiness.
- Supported UAT preparation and feature validation, applying product and business-process knowledge to identify workflow gaps and support continuous product improvement.

#### **Product Subject Matter Expert | Concentrix | Roleplay Bot**

*September 2021–October 2023*

- Served as a Product Subject Matter Expert for an NLP-based roleplay bot used to support employee training and practice scenarios.
- Performed UAT and functional validation of ALBA features to verify behavior against defined requirements, training objectives, and user workflows.
- Worked with stakeholders and technical teams to clarify requirements, expected workflows, and roleplay scenarios, supporting feature development and issue investigation.
- Identified and documented functional gaps, unexpected behavior, and usability issues, and analyzed user feedback to support investigation and resolution of workflow issues affecting the training experience.

#### **User Acceptance Tester | Concentrix | Quality/Coaching Management System**

*January 2020–September 2021*

- Executed end-to-end User Acceptance Testing (UAT) for a Quality & Coaching Management System to validate system features against business requirements and real-world user workflows.
- Reviewed functional requirements and test scenarios to identify gaps and ensure coverage of key business use cases and expected user journeys.
- Created and executed UAT scenarios based on business processes and operational requirements.
- Documented and communicated issues and discrepancies to QA and development teams, and collaborated with business stakeholders to validate feature behavior and confirm readiness before production deployment.

#### **Quality Evaluator | Concentrix**

*October 2015–January 2020*

- Evaluated customer interactions against established quality standards, policies, and performance metrics.
- Identified recurring quality issues and trends through interaction reviews and performance analysis.
- Prepared quality reports and provided structured feedback and coaching recommendations, collaborating with team leaders to improve service quality and process adherence.

#### **Customer Service Representative | Concentrix**

*October 2014–October 2015*

- Assisted customers with account, product, and service-related inquiries, investigating concerns and escalating complex cases to the appropriate teams.
- Documented customer interactions and maintained accurate records to support issue resolution and service quality.

#### **Graphic Artist | Ask Team Tech Update**

*January 2013–October 2014*

- Created digital graphics, layouts, and visual materials for marketing and communication purposes.

## **EDUCATION**

---

### **Bachelor of Science in Computer Studies**

Our Lady of Fatima University — Valenzuela City

*Completed coursework through 3rd year*

### **Associate in Computer Technology**

AMA Computer Learning Center — Meycauayan, Bulacan

*Completed coursework through 1st year*
